

## Touch Screen Features

### Industrial Design - Built For Touch

- Beautiful edge-to-edge glass with a silver trim provides a best-in-class appearance
- Manufactured specifically as a touch screen with toughened glass and rugged design

### High Image Quality

- 1920 x 1080 Full HD resolution with crisp, clear image representation and pure glass front
- Balanced edge-to-display distance for perfect appearance in portrait or landscape

### True Multi-Touch Technology

- Fast and reliable touch performance using the latest 10-point PCAP multi-touch technology
- Extremely responsive touch and fine touch point accuracy for excellent user experience
- Compatible with Windows multi-touch gestures including pan, pinch & zoom
- Plug and play HID controller with no drivers required for Windows 7, 8.1 and 10
- Some support for macOS 10, Brightsign, Chromebox, AMX TPI-PRO, N2300, some Linux kernels and various media players
- Touch with a finger, stylus and most gloves. No touch point drift

### Commercial Grade

- Designed and built with commercial grade, long-life components for quality, extended 24/7 reliability and a reduced Total Cost of Ownership (TCO)
- 3 years warranty and local Australian support
