

### NP1652

Touch POS Terminal

The Nexa NP-1652 is a premium All in One POS terminal that's packed with features like robust aluminium construction, optional integrated RFID reader for fast operator logon, and peace of mind 3 year warranty.

We understand that rent is a serious challenge for many retail and hospitality venues, so counter space is valuable. This is why the NP-1652 comes with three features that allow it to fit into small spaces, including:

- Wall or pole mounting is supported.
- Included stand has a hinge at the base and at the screen for extra flexibility.
- Removable part of the base allows some printers to fit under the screen to reduce footprint.

The NP-1652 is the Pos Terminal you can count on, to speed up operation, (courtesy of the RFID operator logon option), save space, and keep your venue running reliably over the long term, so choose Nexa!

Optional RFID Wristband Reader

Intel Quad Core 2GHz CPU
