Swann Security (Android)

Have a Smartphone or Tablet? With the Swann Security app, you can turn your mobile device into a monitoring centre for your DVR or NVR. Have the peace of mind that you can monitor your home or business at any time from any place. Best of all, it only takes minutes to get it up and running.

To download the app:

1. Go to your app store and search for **"Swann Security"** or using your mobile device, scan the QR code below.

2. Follow the on-screen instructions to install and accept any license requirements that may appear.

3. After installing Swann Security, locate the app, and tap the icon to run.
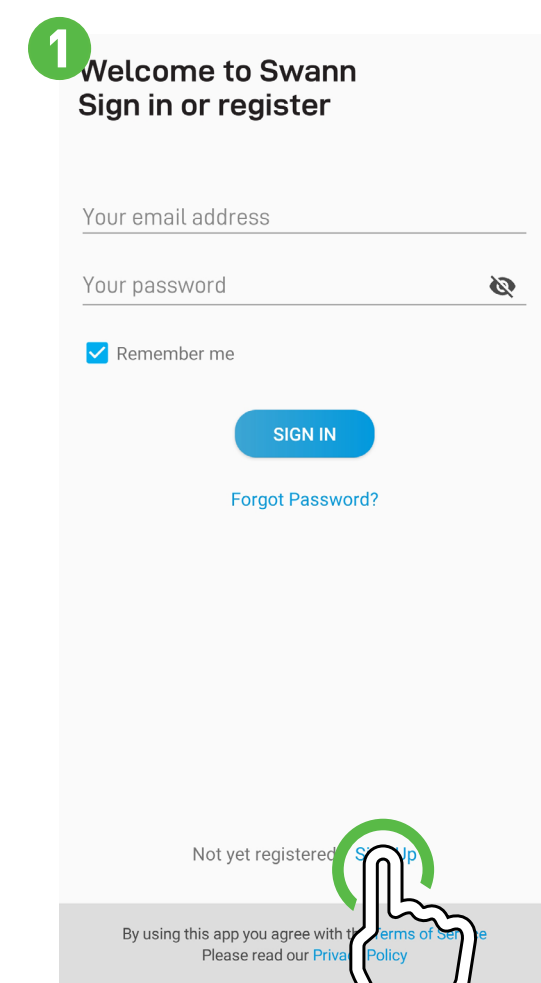

GET IT ON
Google Play

You may need to download a QR code reader to your mobile device to scan this QR code.

For instructions on the functions available, access the User Manual **within the app**. You can also download this manual from our website **support.swann.com**, search for – Swann Security Manual.

Registering your Account

**① Welcome to Swann Sign in or register**

Welcome to Swann. Sign in or register.

If you have already registered an account with the app, sign in with your Swann Security credentials, then skip to step 7.

For new users, tap "Sign Up".

Proceed to step 2.

② Sign Up — Let's get started.

Let's get started.

Enter your first and last name, email address, and password. The password has to be a minimum of six characters and <u>must</u> contain a mixture of numbers and letters (use a password that you can remember). Enter your password again to confirm. For safekeeping, <u>write down your password</u>.

When finished, tap "NEXT".

Proceed to step 3.

③ Sign Up — Is this where your devices are?
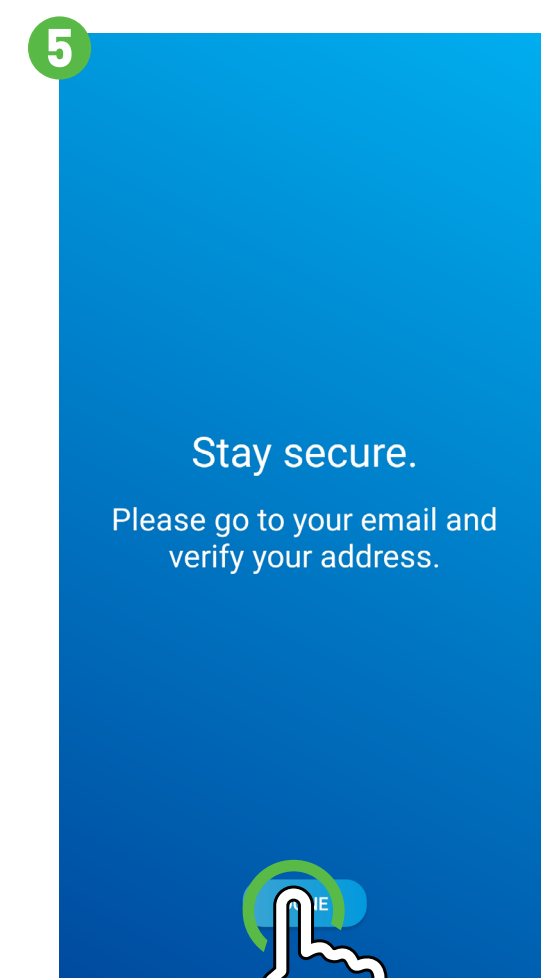

Is this where your devices are?

The app will ask if it can access your device's location, tap "Confirm" then tap "Allow only while using the app" (it does this so it can accurately detect the location of your mobile and DVR or NVR).

The app will detect your address. If the address isn't shown, tap the blue icon, input your address, then tap "DONE".

When finished tap "NEXT".

Proceed to step 4.

④ Sign Up — Confirm your details.

Confirm your details.

Your name, email address, and device location will be shown here.

Tap the "Terms of Service" checkbox then tap "REGISTER".

Proceed to step 5.

Registering your Account

⑤ Stay secure.

Stay secure.

You will receive an email asking to verify your email address. Go to the email app on your mobile device or computer, open the email, and tap or click the link to verify (if the email hasn't been received, check your junk or spam folder). Once verified, you will receive a welcome email confirming your registration.
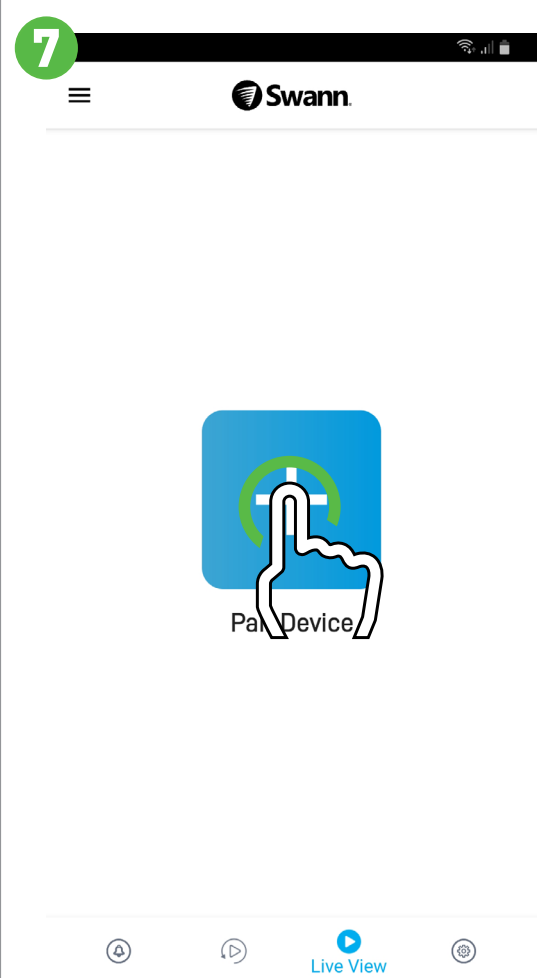

When finished, tap "DONE".

Proceed to step 6.

⑥ Welcome to Swann Sign in or register

You will be taken back to the sign-in page. Upon verification, enter your email address and account password then tap "SIGN IN".
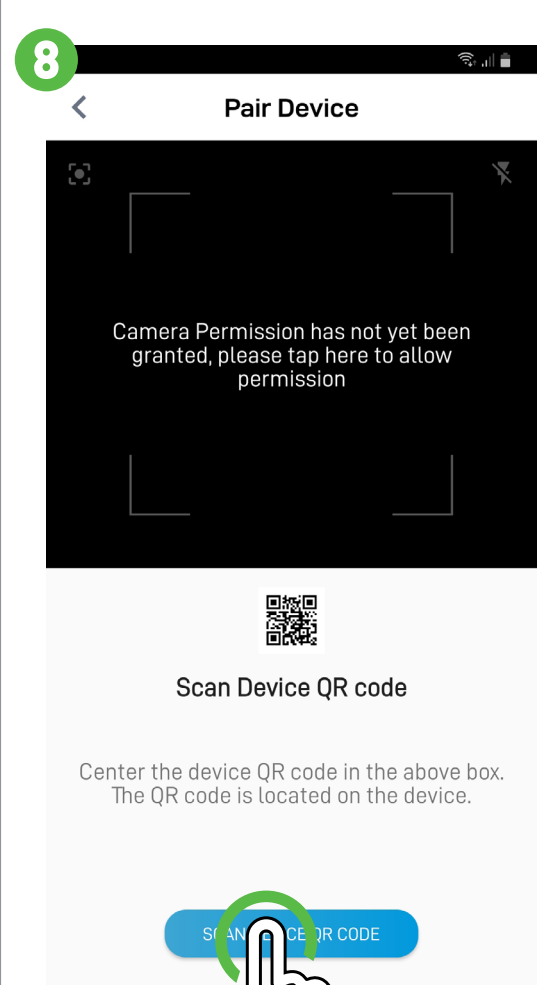

Proceed to step 7.

Pairing your Device

⑦ Swann — Pair Device

After sign in, to pair your DVR or NVR to your account, you need to scan the device's QR code. Make sure that your DVR or NVR is connected to your router so it has access to the internet.
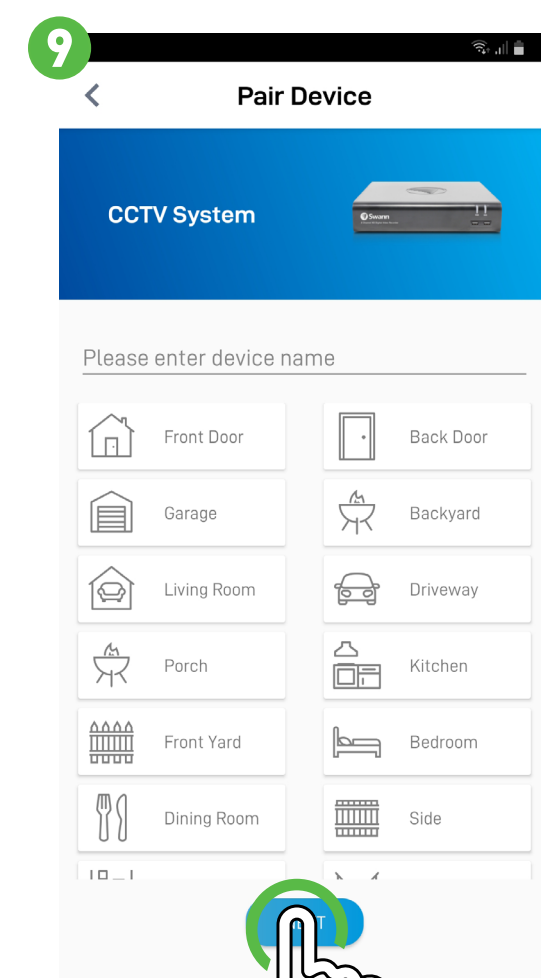

When ready, tap "Pair Device" then tap "START".

Proceed to step 8.

⑧ Pair Device — Scan Device QR code

Tap "SCAN DEVICE QR CODE". The app will ask if it can take pictures and record video, tap "Allow".

Scan the QR code sticker on top of your DVR or NVR with your mobile device. When the QR code has successfully scanned, proceed to step 9.

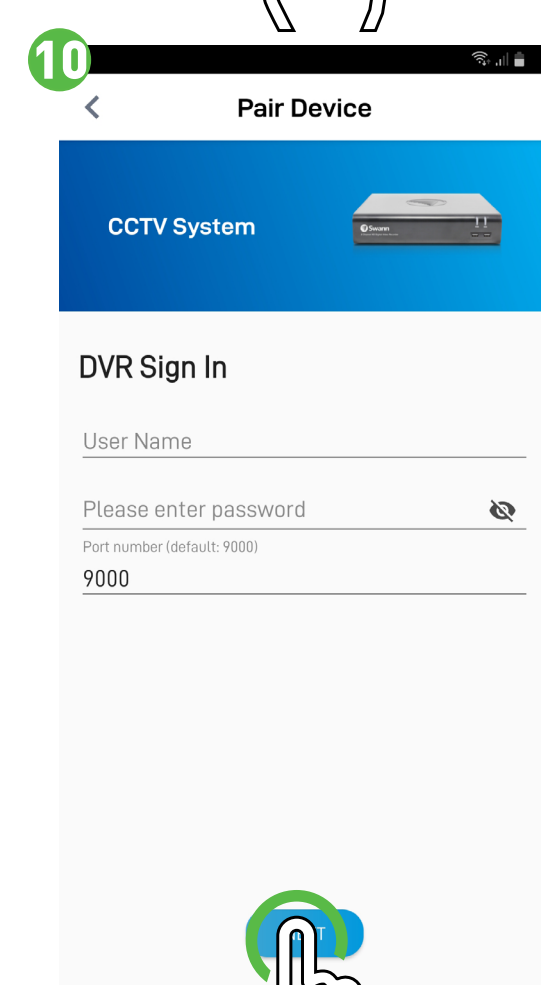

Pairing your Device

⑨ Pair Device — CCTV System

Enter a device name for your DVR or NVR, "My DVR" for example, or tap on one of the relevant locations listed.

When finished, tap "NEXT".
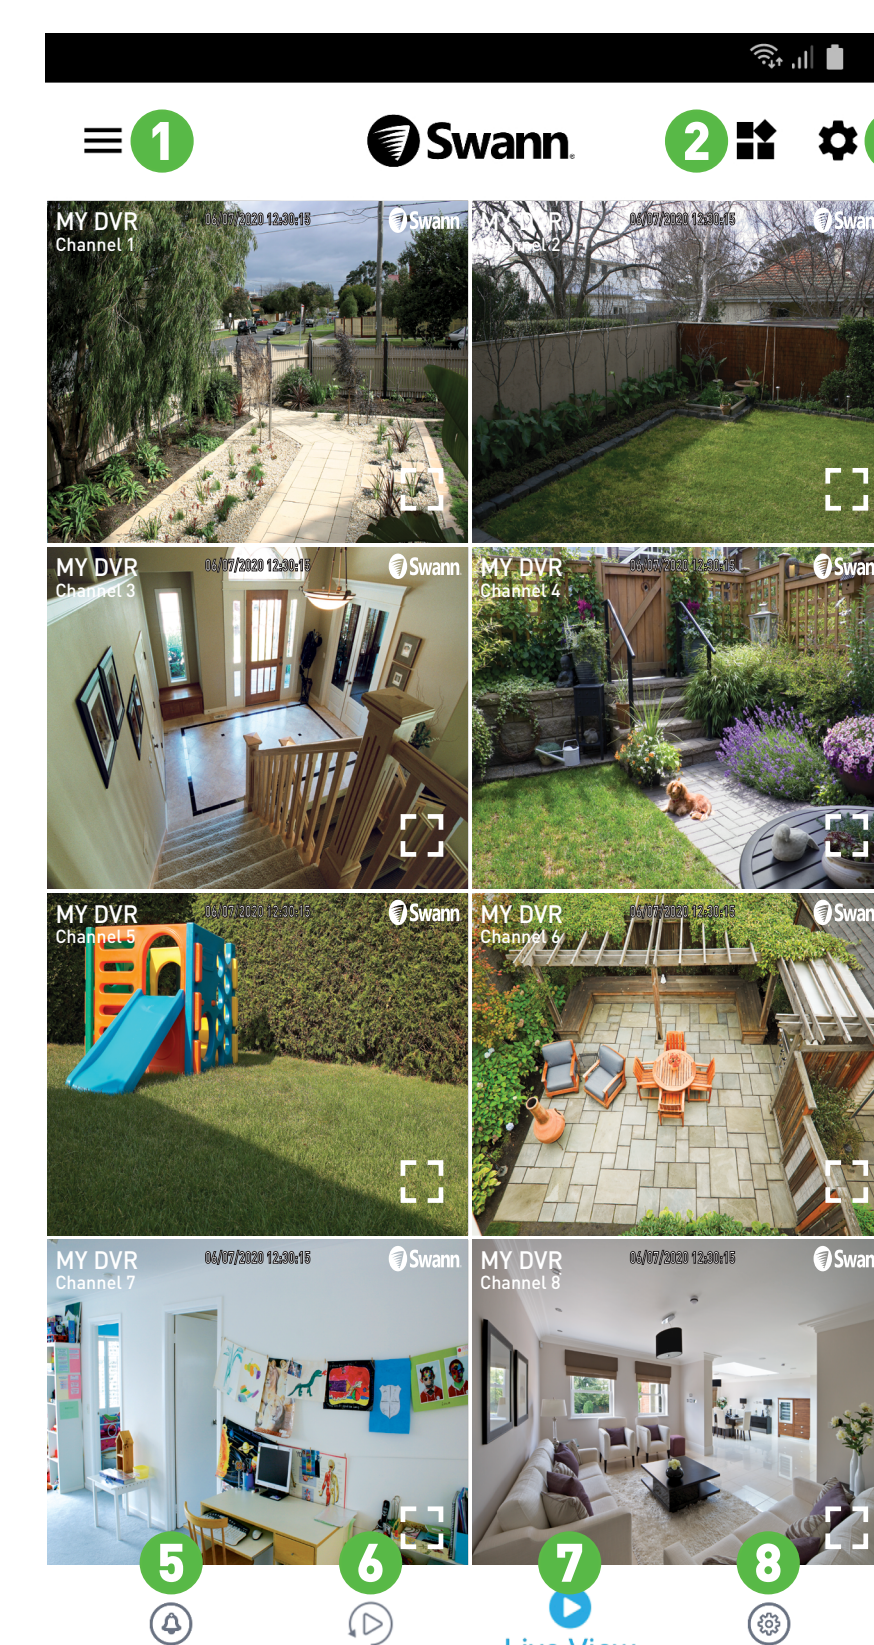

Proceed to step 10.

⑩ Pair Device — CCTV System — DVR Sign In

User name: The default user name for your DVR or NVR is <u>admin</u>, tap to enter.

Password: Enter the <u>password</u> created during the <u>Startup Wizard</u> on your DVR or NVR (there is no default password).

Port number: Leave the default setting (unless you are instructed to change it by Swann Technical Support).

When finished, tap "NEXT".

Your device is now linked to your Swann Security account, tap "DONE" to finish.

1. Tap to open the Menu. From here you can edit your account profile, pair a new device, view notifications, read the user manual, and more.

2. Tap to toggle the layout of the camera (channel) tiles in the viewing area.

3. Tap to disable offline cameras and to change the display order of paired devices (if multiple security devices are paired).
4. Tap to view the camera full screen and to display controls such as taking a snapshot, start a recording, enable the camera's microphone, alarm & pan-tilt controls (if supported), and to change the display aspect ratio and stream quality. Turn your mobile device horizontal to view the camera full screen.

5. Tap to access the Notifications screen where you can view and manage notifications.

6. Tap to access the video activity timeline where you can search and view events located on your DVR or NVR.

7. Tap to access or return to Live View mode to view live video from your cameras.

8. Tap to access device & camera settings. From here, you can change the device name, motion settings, siren settings, view technical information about your device, and more.

When viewing a camera full screen (as per instruction 4), use the spread and pinch gestures to zoom in or out. When zoomed in, tap and hold the image to move around within the Live View. This works when holding your mobile device horizontally or vertically.
